Reference Letter for company Power Factory from Poland (www.power-factory.pl)

We are very pleased to confirm that Power Factory performed on the highest professional and operational level during the World Athletics Indoors Championships Torun 2026, where Power Factory was appointed as a Critical Power provider.

Power Factory delivered all phases of the Critical Power project lifecycle in the commendable manner, even though the tender process and the appointment of Power Factory for the role of the Critical Power provider was heavily delayed. In the very short preparations and planning phase, followed by very dynamic onsite implementation phase, Power Factory was able to deliver:

- Proper project delivery planning documentation
- Initial and detailed set of the critical power designs
- Warehouse preparation and testing of the equipment with properly timed logistics
- Immaculate installation, setup and commissioning of the critical power systems
- 24/7 maintenance team, able to support with any difficulties related with Critical Power

Power Factory, owned and led by Piotr Żakowski, proved as a very capable, reliable and trustworthy partner in a delivery of such a sensitive system being the Critical Technical Power, being the backbone system of the broadcast and critical technical services of the WIC26 event. We are looking forward to cooperating with Power Factory again on the future events.

Kindly reach out to us on nkovacevic@hbs.tv should you have any further inquiries.

Best regards,

Nikola Kovačević
